Re: Potentiometric Maps
RI/FS for McIntosh Plant Site
Olin Chemicals McIntosh, Alabama
WCC File 90B449C-3A
Document Control Number WCC-287

Dear Ms. Smith:

During our review of recent documents submitted to EPA for the Olin McIntosh RI/FS, we realized that the corrective action well locations were inadvertently omitted from potentiometric maps. We feel that the corrective action well locations are important in the interpretation of these maps. Therefore, at the request of Mr. Jim Brown of Olin, we have enclosed 15 copies of Figure 17 and Figure 18 from the Preliminary Site Characterization Summary submitted to EPA on April 16, 1992. Also enclosed are five copies of Figure 3 from the Exposure Assessment submitted to EPA on June 2, 1992.

We request that you distribute these figures to the individuals who are reviewing the documents, and we apologize if this has caused you any inconvenience.

Very truly yours,

William A. Beal

Dennis E. Reece
